Communication through the CSR report

We incorporated as many of the opinions received from our stakeholders through the questionnaire on our previous CSR report as possible into this CSR report.

Opinions received from the questionnaire

- In the report, straightforward corporate information, including management policies and environmental data, was given.
- Technical details need to be complemented by illustrations or should be explained more intelligibly.
- First I did not know where I could get a copy of the report, but eventually I got one at Nikon Salon. I really want to get a copy of the next report, too.
